

Dear friends and colleagues-

I hope you can join me at the opening of MIX22 where I will be presenting **Schema CorpoReal**, a New-media Performance & Installation exploring the politics and cultural attitudes about gender and identity through the integration of personal text narratives, barcode label technology, and my body as an interactive canvas. **Schema CorpoReal** references the socio-scientific discourse of the "body image," and the manner in which the poetics of language plays a determining role in the creation of persona and Self.

MIX22
